

Aquatic Adventure Camp is perfect summer experience for your young nature lover.

Aquatic Adventure is designed to balance the fun of summer with science. The County's pontoon boat serves as a floating classroom while our kayaks become vessels for explorations. During this week, freshwater ecology is brought to life through activities such as birding, water sampling, fishing and daily experiments. The experience is rounded out with paddling the creek and coves, and lake shore explorations. Campers will take part in a conservation project.

Each camper will be supplied with a kayak, personal floatation device (PFD), and paddle. Campers will receive instruction on kayaking basics and water safety. Each camper will also receive an Aquatic Adventure t-shirt.

Aquatic Adventure Camp

Ages: children entering grades 7-9

Location: Mercer County Marina
